

ifo HACK

APRIL
28-30, 2023
MUNICH

JOIN US FOR OUR FIRST ifo HACKATHON!

Be part of a team and **develop a solution** to an **economic or social problem** using any technology within **46 hours**. Push your skills, prototype, showcase your results, and have fun!

EAT. SLEEP. HACK. REPEAT. ...

WHY ALL THIS?

Combining **economic reasoning** and **technical knowledge** with basic programming and modern web technologies yields enormous potential for research and businesses alike. **Replicability, transparency, and collaboration** are increasingly important for the academic community and society.

WHO CAN PARTICIPATE?

Calling all students and practitioners from technical fields such as business, **economics**, econometrics, statistics, **data science**, sociology, **design**, computer science, engineering, physics – everyone is welcome, as long as you are willing to **learn** something new, **help** others, **change** perspective, and tackle a problem **hands-on**. Basic knowledge and experience in programming with Python (~1 year) is a plus.

WHAT'S IN IT FOR YOU?

- ▶ Have an unforgettable experience, a steep learning curve, and lots of fun!
- ▶ Food, hacking spaces, exciting data, and infrastructure will be provided – expect nice surprises!
- ▶ Meet like-minded hackers and work on meaningful projects.
- ▶ Learn to think like an economist and choose the right tools.
- ▶ Gain insight into Germany's leading economic research institute.
- ▶ Improve your CV and win great prizes!

REGISTER NOW!

Start: April 28, 03:00 p.m.
End: April 30, 05:00 p.m.
